Recycled White
F1-8699

Terrene
F1-4340

Khaki
F1-4331

The original Avonite Recycled Collection is growing to include these double green products from our Foundations acrylic line. Each of these natural tones contain a minimum 16% recycled content that would otherwise go to landfill. Because these products are produced with our wide belt facility in Kentucky, that means they are available in 1/2" and 1/4" thickness, seamless wide sheets, and custom sizes. Now you can have a recycled product to use on vertical applications and specify the size you need to prevent waste and save labor cost all at the same time. How green is that?
